naturaLED® Plusrite Emergency Driver with Self Learning Diagnostics (SLD) Named to 2026 IES Progress Report

Innovative emergency lighting technology honored by the Illuminating Engineering Society for advancing lighting performance and code compliance

Ontario, CA, August 17, 2026 – naturaLED® (www.naturaled.com), announced that its Plusrite Emergency Driver with Self-Learning Diagnostics (SLD) has been recognized in the 2026 Illuminating Engineering Society (IES) Progress Report, an annual program highlighting products and technologies that advance the art and science of lighting.

The Plusrite Emergency Driver with SLD was selected for its intelligent approach to emergency lighting, introducing automated testing technology that minimizes operational disruptions while helping facility managers maintain emergency lighting systems in accordance with applicable code requirements.

Unlike conventional emergency drivers that initiate diagnostic testing on fixed schedules, the Plusrite Emergency Driver employs Self-Learning Diagnostics to analyze a facility's lighting usage patterns over a seven-day learning period. Based on those patterns, the system automatically schedules required diagnostic tests during normal OFF hours whenever possible, reducing the likelihood of emergency lighting tests occurring while spaces are occupied.

In addition to its adaptive scheduling capabilities, the emergency driver automatically performs monthly functional testing and the required 90-minute discharge test every 180 days while continuously monitoring battery condition and overall system performance. The automated testing and monitoring reduce maintenance requirements and provide facility personnel with greater confidence in emergency system readiness.

"The inclusion of our Plusrite Emergency Driver with Self-Learning Diagnostics in the 2026 IES Progress Report is a meaningful recognition of the engineering behind this product," said Frank Grobmeier, naturaLED spokesperson. "As buildings become increasingly intelligent, emergency lighting should be equally smart. Self-Learning Diagnostics offers a practical solution that helps simplify compliance and avoid unnecessary testing during normal building operation."

naturaLED®'s Self Learning Diagnostics technology represents the next evolution of emergency lighting.

--- END ---

About NaturaLED:

NaturaLED is a leading provider of innovative lighting solutions that combine energy efficiency, durability, and exceptional performance. With a commitment to sustainability and customer satisfaction, NaturaLED continues to push the boundaries of lighting technology to create products that meet the evolving needs of the market.
